

## MisClases

### EVA2\_1\_UML

- main(args: String[]): void

### Persona

- ID: String
- name: String
- age: byte
- getID(): String
- setID(x: String): void
- getName(): String
- setName(x: String): void
- getAge(): byte
- setAge(x: byte): void

### Tv

- channel: short
- vol: byte
- powerOn: boolean
- getChannel(): short
- setChannel(x: short): void
- getVol(): byte
- setModel(x: byte): void
- getPowerOn(): boolean
- setPowerOn(x: boolean): void

### Vehiculo

- brand: String
- model: String
- year: short
- getBrand(): String
- setBrand(x: String): void
- getModel(): String
- setModel(x: String): void
- getYear(): short
- setYear(x: short): void
